AN5275

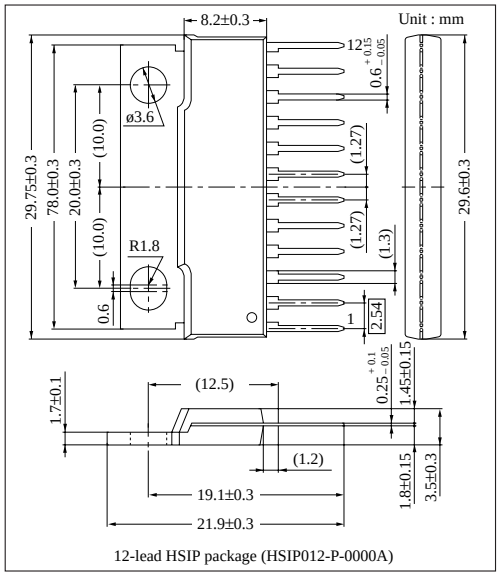
15W × 2Ch. Low Frequency Power Amplifier Circuit for TV

■ Overview

The AN5275 is an audio power IC developed for TV sound output (15W × 2Ch.).

High density mounting is possible and it can contribute to cost reduction, because it requires fewer external components.

It incorporates various protective circuits to provide high reliability and breakage resistance.



12-lead HSIP package (HSIP012-P-0000A)

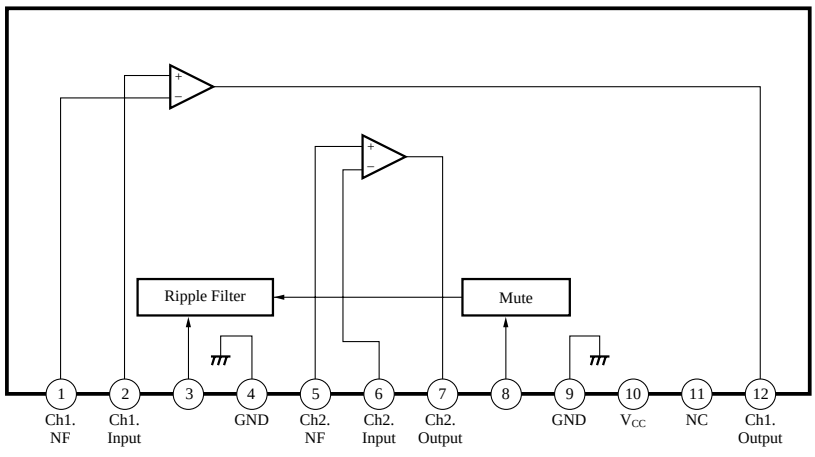
■ Features

- Wide operating supply voltage range (10 to 40V)
- Little distortion and noise
- Fewer external components
  - · BS (boot-strap) electrolytic capacitor not required
- Audio muting function built-in
- Very small shock noise at power ON/OFF
- Various protective circuits built-in
  - · Load short-circuit protection. Protection against over-voltage and – current. Temperature protection

■ Pin Description

Pin No.	Pin Description	Pin No.	Pin Description
1	Ch.1 NF pin	7	Ch.2 output pin
2	Ch.1 input pin	8	Muting pin
3	Ripple filter pin	9	GND (sound output side)
4	GND (sound input side)	10	Supply voltage
5	Ch.2 input pin	11	NC
6	Ch.2 NF pin	12	Ch.1 output pin

■ Block Diagram



■ Absolute Maximum Ratings (Ta= 25˚C)

Parameter	Symbol	Rating	Unit
Supply Voltage	V_{CC}	4.5	V
Supply Current	I_{CC}	4.0	A
Power Dissipation Note 1)	P_D	25	W
Peak Supply Voltage Note 2)	V_{surge}	60	V
Operating Ambient Temperature	T_{opr}	– 25 ~ + 80	˚C
Storage Temperature	T_{stg}	– 55 ~ + 150	˚C

Note 1) $R_{\theta j-c}$ = 2˚C/W
Note 2) t = 0.2s

■ Recommended Operating Range (Ta = 25˚C)

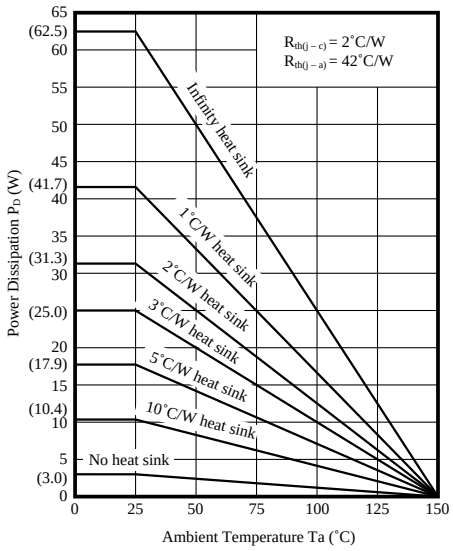
Parameter	Symbol	Range
Operating Supply Voltage Range	V_{CC}	10.0V ~ 40.0V

■ Electrical Characteristics (V_{CC}= 32V, $f_{req.}$= 1kHz, Ta= 25±2˚C)

Parameter	Symbol	Condition	min.	typ.	max.	Unit
Static Circuit Current	I_{CQ}	V_{IN}= 0mV, R_L= 8Ω	—	100	200	mA
Output End Noise Voltage Note 1)	V_{NO}	Rg= 4.7kΩ, R_L= 8Ω	—	0.12	0.4	mVrms
Voltage Gain	G_V	V_{IN}= 57mV, R_L= 8Ω	32	34	36	dB
Total Harmonics Distortion	THD	V_{IN}= 57mV, R_L= 8Ω	—	0.05	0.40	%
Max. Output Power	P_O	THD= 10%, R_L= 8Ω	11	15	—	W
Ripple Rejection Ratio Note 1)	RR	R_L= 8Ω, Vr= 1Vrms f_r= 120Hz, Rg= 4.7kΩ	45	57	—	dB
Channel Balance	CB	V_{IN}= 57mV, R_L= 8Ω	–1	0	1	dB

Note 1) 15Hz to 30kHz (12dB/OCT) filter is used for measurement.

P_D – Ta



Request for your special attention and precautions in using the technical information and semiconductors described in this material

(1) An export permit needs to be obtained from the competent authorities of the Japanese Government if any of the products or technologies described in this material and controlled under the "Foreign Exchange and Foreign Trade Law" is to be exported or taken out of Japan.

(2) The technical information described in this material is limited to showing representative characteristics and applied circuit examples of the products. It does not constitute the warranting of industrial property, the granting of relative rights, or the granting of any license.

(3) The products described in this material are intended to be used for standard applications or general electronic equipment (such as office equipment, communications equipment, measuring instruments and household appliances).
Consult our sales staff in advance for information on the following applications:
- Special applications (such as for airplanes, aerospace, automobiles, traffic control equipment, combustion equipment, life support systems and safety devices) in which exceptional quality and reliability are required, or if the failure or malfunction of the products may directly jeopardize life or harm the human body.
- Any applications other than the standard applications intended.

(4) The products and product specifications described in this material are subject to change without notice for reasons of modification and/or improvement. At the final stage of your design, purchasing, or use of the products, therefore, ask for the most up-to-date Product Standards in advance to make sure that the latest specifications satisfy your requirements.

(5) When designing your equipment, comply with the guaranteed values, in particular those of maximum rating, the range of operating power supply voltage and heat radiation characteristics. Otherwise, we will not be liable for any defect which may arise later in your equipment.
Even when the products are used within the guaranteed values, redundant design is recommended, so that such equipment may not violate relevant laws or regulations because of the function of our products.

(6) When using products for which dry packing is required, observe the conditions (including shelf life and after-unpacking standby time) agreed upon when specification sheets are individually exchanged.

(7) No part of this material may be reprinted or reproduced by any means without written permission from our company.

Please read the following notes before using the datasheets

A. These materials are intended as a reference to assist customers with the selection of Panasonic semiconductor products best suited to their applications.
Due to modification or other reasons, any information contained in this material, such as available product types, technical data, and so on, is subject to change without notice.
Customers are advised to contact our semiconductor sales office and obtain the latest information before starting precise technical research and/or purchasing activities.

B. Panasonic is endeavoring to continually improve the quality and reliability of these materials but there is always the possibility that further rectifications will be required in the future. Therefore, Panasonic will not assume any liability for any damages arising from any errors etc. that may appear in this material.

C. These materials are solely intended for a customer's individual use.
Therefore, without the prior written approval of Panasonic, any other use such as reproducing, selling, or distributing this material to a third party, via the Internet or in any other way, is prohibited.
